PROJECTS

WhereTo | <https://wheretony.netlify.app/> | github.com/KdoubleUs/Restaurant-CRUD-WebApp

Javascript, NodeJS, ExpressJS, ReactJS, Bootstrap, MongoDB, Mongoose

- Full-Stack application where users are able to perform CRUD functionality to share their favorite locations in New York for activities, eating, or drinking.
- Project manage the application where agile software development was implemented. Establish daily routines for stand-ups, created sprints, and scope for the team.
- Full Stack development with a backend deployed to Heroku and front-end deployment with Netlify
- Database using non-relational No-SQL database(mongodb) to store post.
- Application's security feature created using google authentication

Linkfin | github.com/KdoubleUs/linkedinfin-FP

ReactJS, Django, Postgresql, Python, Javascript

- Full CRUD functionality of a mockup version of a mocked-up version of LinkedIn with front-end development using ReactJs and backend development using Django Rest-framework.
- Application's security feature using session-based authentication to establish user-login and persist user's data.

CardWar | <https://cardwarbattles.netlify.app> | github.com/KdoubleUs/KW-Card-War-Game-M

Javascript, HTML5, CSS3

- Fully functional turn-base game of card war using the concepts of Object oriented programing.
- Application built on vanilla Javascript/HTML5/CSS3

KantoPokeDex | <https://kantopokedemodal.netlify.app> | github.com/KdoubleUs/Pokemon-React-UI-Modal

Javascript, ReactJS, Bootstrap

- Focuses on UI development and designs for users to create a Pokemon library of the original 151 Pokemon.
- Utilize asynchronous call to fetch JSON data from a REST API

EXPERIENCES
